

About Us

Stove Bright® high resistant Liquid and Powder coatings have been developed to provide the highest quality finishes for use in applications that require heat resistance up to 650°C (1200°F). We provide continued Research and Development, our coating formulations continue to exceed industry demands for improvements in rust protection, chemical resistance, low smoke and other performance characteristics.

Stove Bright® is proudly manufactured by Forrest Technical Coatings. Forrest was established in 1973 in Eugene, Oregon, USA. We are the worldwide leader in coatings for a wide range of temperature resistance needs, including products that perform at peak temperatures in excess of 650°C. Applications include: **Wood Stoves, Exhaust Systems, Pellets Stoves, Gas Stoves, Gas Logs, Barbeques**

Forrest has delivered quality products to manufacturers for more than 45 years. Our laboratory provides quality control along with dynamic research and development. We work closely with our customers to match individual coating performance and application requirements with coating solutions for the best finish.

Stove Bright® products are available from 12 worldwide Warehouses in Europe, England, China, Australia, New Zealand, as well as throughout Canada and the USA.
